

ETOP · IBCSG PARTNERS

Foundation for International Cancer Research

The ETOP IBCSG Partners Foundation is one of the leading organisations in clinical and translational breast and lung cancer research. As an international academic research organisation, the ETOP IBCSG Partners Foundation enables the implementation of global research projects at the highest level.

To join our team, we are looking for a

CLINICAL TRIAL MANAGER 100%

You will be responsible for the trial management of international phase II and phase III clinical studies in lung cancer research. You will be the main contact person for investigators and study managers of the clinical centres. Your tasks include coordination, support and documentation from the start to the end of the study. You will also write and distribute instructions and other study-specific documents and train study centres.

You have a medical or scientific education (biology, pharmacy, nursing or similar). You are an organisational talent and team player, work responsibly, reliably and like to communicate. The position requires very good oral and written English language skills as well as experience handling databases and IT systems.

Starting from the 1st of October 2022, we offer you an exciting job with a lot of responsibility in an international environment. You will profit from annual working hours, 25 days of holiday (up to 7 weeks are possible on request), good social benefits and a collegial working environment close to Bern railway station.

Ms Susanne Roux, Head Clinical Trial Management, will be happy to provide you with additional information regarding the job description and job profile
susanne.roux@etop.ibcsg.org.

Please send your application electronically to Marianne Wenger, Human Resources, ETOP IBCSG Partners Foundation, Coordinating Center, Effingerstrasse 33, 3008 Bern
marianne.wenger@etop.ibcsg.org.
